

Silect Assistant for SCOM

Secure AI Purpose-Built for IT Operations

Overview

Modern IT environments are more complex than ever—and traditional monitoring tools alone are no longer enough.

The Silect Assistant for SCOM is a secure, AI-powered solution designed specifically for organizations running Microsoft System Center Operations Manager (SCOM). It enables natural language queries, intelligent insights, and automated analysis.

Move beyond reactive monitoring to proactive, AI-driven IT operations.

Key Benefits

- Intelligent insights using natural language
- Faster problem resolution with AI-guided recommendations
- Proactive detection of anomalies and trends
- Enterprise-grade security with on-prem deployment options

Core Capabilities

- Natural Language Interaction
- Alert Optimization & Enrichment
- Root Cause Analysis
- Anomaly Detection
- Trend Analysis & Forecasting
- Dataset Analysis (RAG-enabled)

Seamless Integration

Built on the Silect MCP Server for SCOM, integrates with:

- Silect MP Studio
- Silect Operations Portal
- Grafana Dashboards for SCOM
- ServiceNow & JIRA
- Microsoft Copilot

Flexible Deployment Options

On-Premises:

- Full data control and security
- Ideal for regulated environments

Hybrid / Cloud:

- Optional OpenAI-compatible services
- Advanced reasoning capabilities

The Silect Assistant allows you to answer questions like:

- Are there any problems with our critical applications?
- How do I fix this problem?
- Why is this monitor unhealthy?
- Summarize SQL environment health
